Website: https://github.com/rodrigommfreitas

Date of birth: 09/10/2002 **Nationality:** Portuguese

ABOUT ME

I am a full stack web developer and currently a Computer Science student with expertise in technologies such as JavaScript and various frameworks. I have the ability to adapt quickly to new challenges and emerging technologies.

WORK EXPERIENCE

[01/07/2023 – 31/08/2023]

Full Stack Web Developer (On site professional internship)

FreeBalance

I built three different projects using Java Spring Boot for the back-end and React with TypeScript and Bootstrap for the front-end. One of the projects required building a custom and interactive interface using a data visualization library (react-d3-tree) which allowed the representation of a complex data structure and the ability to perform different database operations involving the use of algorithms and recursive functions.

PROJECTS

Full stack social media apps

Full stack "clones" for both twitter and facebook. These projects include the main functionalities of each website including authentication, creating posts, interaction between users, profile editing, file uploading, etc. For the twitter clone I used Next.js, NextAuth.js, Prisma, Tailwind CSS, tRPC and MySQL and for the facebook clone I used the MERN stack (MongoDB, Express.js, React, Node.js) and also TypeScript and Tailwind CSS.

More projects

The projects above are the ones I am proud of the most but I have done many more interesting projects which can be found in my github page (https://github.com/rodrigommfreitas).

EDUCATION AND TRAINING

[Current]

Computer Science Bachelor Degree

University of Madeira

Full Stack JavaScript curriculum

The Odin Project

DIGITAL SKILLS

Languages

JavaScript/TypeScript | Java | Some Python and PHP | CSS | HTML

Frameworks and Libraries

React | Next.js | Node.js | Express.js | Spring (Spring Boot) | SASS | Bootstrap | Tailwind CSS

Databases

SQL | MongoDB

Others

Git | Postman
